## THE BLACK FRENCH PRESS

Our French Press offers style, convenience, and most importantly, unparalleled flavor. Make perfect coffee (in only 4minutes!), steep some loose tea or just use the pitcher to serve cold beverages. Double-wall insulation means it will stay hot or cold depending on the need.

All parts are dishwasher safe so it is very easy to take care of. It is built to last, made entirely out of 18/10 stainless steel.

- Stunning and durable thanks to PVD\* plating (Physical Vapor Deposition – Ion Plating Process)
- UV top coating reduces fingerprints

\*PVD coating is also known as the new “lean and green” process: It is totally environmentally friendly and safe (unlike conventional chemical treatments). It is 100% clean.

Patented dual filtration system features an exclusive Italian fine-gauge screen and coil/spring combination.

# DECALCIFIERS

Keep your machine **HEALTHY**, your friends and family **HAPPY** by descaling with the #1 brand.

### Trust durgol®, the World Market Leader

Durgol® was invented in Switzerland over 60 years ago. Over the years, this formula has been further perfected to become the world market leader in decalcification

The only descaler that protects your machine from an irreversible "heart attack"

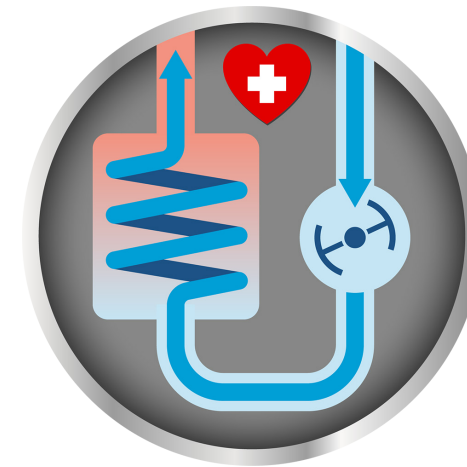

### Your coffee machine's heart attack is preventable

Don't make your coffee/espresso machine huff and puff! If you: don't descale regularly, or use an inefficient descaler, it takes longer to brew (reduced heat transfer) and the coffee doesn't taste as good. Ultimately, the machine suffers the inevitable heart attack or, if recognized in time, at the very least will need to be returned for an expensive service.

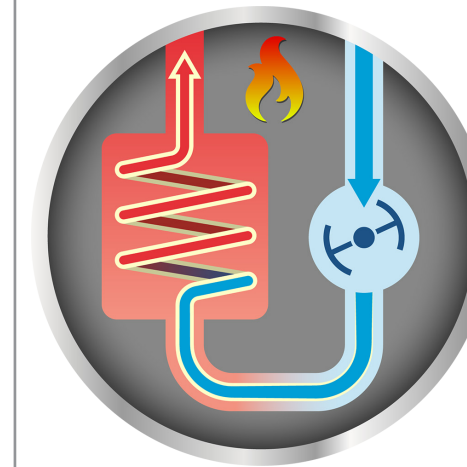

→ It doesn't have to be that way! Thanks to regular descaling with durgol®, you keep your machine healthy and you enjoy your superb quality coffee or espresso for a long time. Here's what happens inside your machine:

#### durgol®

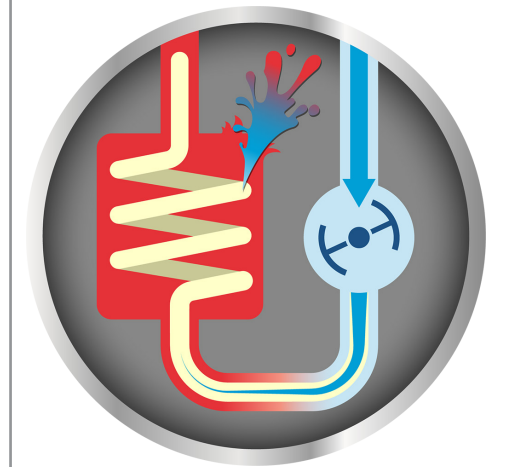

durgol® is the only descaler that removes 100% of the limescale and will NOT leave any calcium citrate or calcium lactate build-up behind. Your machine is basically returned to "factory new".

#### Citric Acid

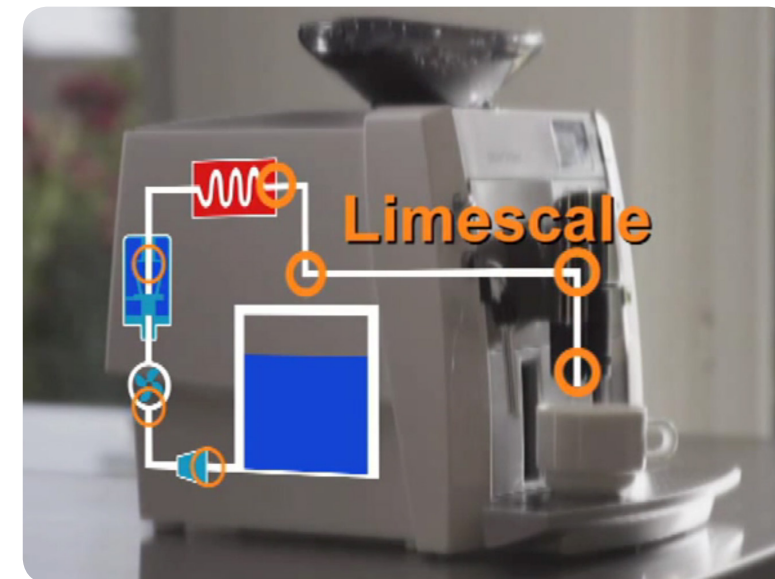

Citric Acid based products cannot remove 100% of the limescale AND form an extra layer of calcium citrate on top of the remaining limescale! Your machine has begun to fail.

#### Vinegar

Vinegar stinks up the house and descales very slowly. The coffee will taste like vinegar for a long time. Vinegar turns tubes brittle and porous. Ultimately, they will crack or burst.

Typical choke points caused by limescale

# DECALCIFIERS

## durgol® guarantees:

### Nothing works better

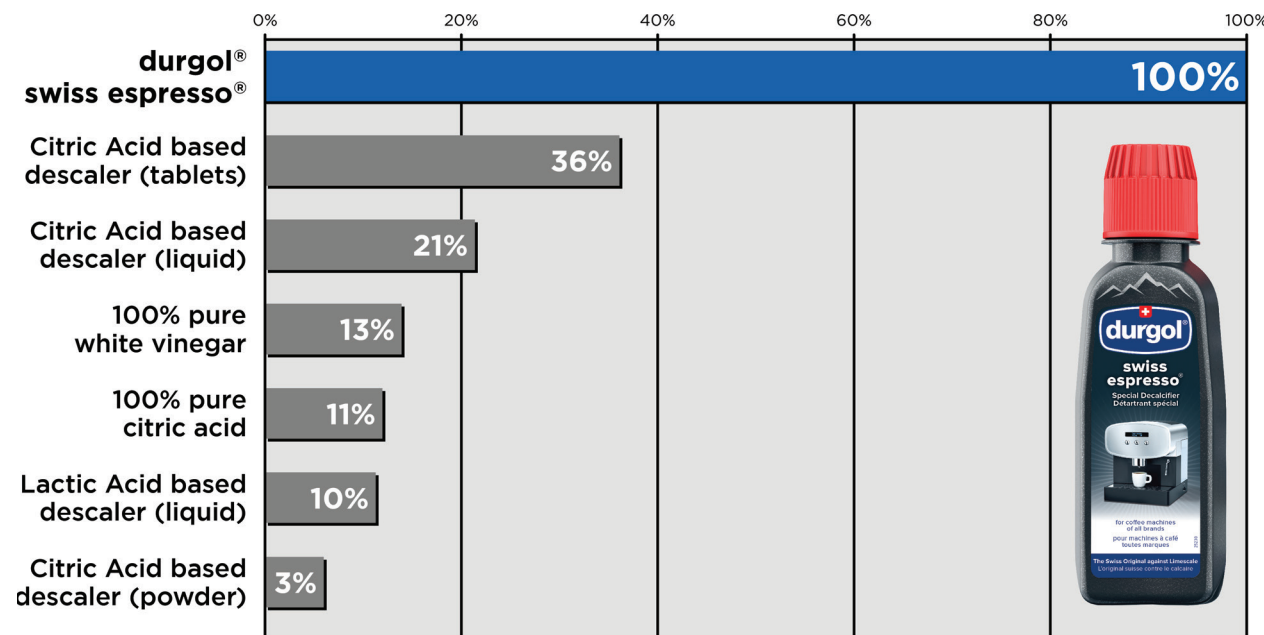

- ✓ safe for ALL brands
- ✓ no residue, no odor, no aftertaste
- ✓ extends the life span of the machine
- ✓ environmentally safe; 100% recyclable PET bottles
- ✓ Made in Switzerland

### Nothing is easier

- ✓ ready for use
- ✓ no need to dissolve in water (unlike powders and tablets)
- ✓ fast, yet effective
- ✓ powerful, yet gentle to the machine
- ✓ regular use ensures optimal coffee/espresso quality

## Here's how various descalers compare:

2014 Lab test with 99% pure limescale (calcium) cube placed for 15 minutes in 200 ml decalcifier solution

See illustrations on pages 9 and 10

A little goes a long way. swiss espresso® will prevent limescale buildup and promote proper flow in all types of coffee and espresso machines!

ITEM #	DESCRIPTION	UPC / EAN

Commercial size is perfect for appliance service centers, coffee shops, high traffic office environments etc.

## Limescale is the *bad cholesterol* of coffee machines

Limescale clogs up your coffee machine's tubes and inner workings just like bad cholesterol clogs up your arteries.

And if that wasn't bad enough, there's **calcium citrate**: It forms when you descale with citric acid based cleaners. Calcium citrate forms another layer inside your machine that cannot be dissolved by any cleaner (not even durgol®)!

You want both gone, for a machine that's clean and pristine, happily pumping away for years of an active life.

- ✓ Safe for all brands
- ✓ Easy to use
- ✓ 10 times faster

### DURGOL® UNIVERSAL

- Multi-purpose decalcifier for countless household items
- For coffee machines, kettles, ceramic tiles, faucets, irons and more
- Works 5 to 10 times faster than other brands

These are just a few of the items durgol® universal® decalcifies in no time

### DURGOL® SWISS STEAMER®

- Specifically formulated to decalcify all brands of built-in steamer ovens
- For optimal quality of steamed foods
- Regular use ensures proper functioning of the appliance

Heated or standing water causes limescale. Limescale buildup is not only unsightly when visible, but it *poses a real danger* where it isn't seen – inside appliances (from coffee/espresso machines to steam irons). That is where – *just like bad cholesterol – deposits will clog and corrode the interior over time.*

## CONCEPT PLUS

- Patented, 3-position vented glass lid with silicone rim fits into specially designed side handles:
- Diamond reinforced nonstick coating on pots (see Diamond)
- Multi-function silicone insert can be used as pasta insert, steamer, colander, trivet, or splatter guard. Insert is dishwasher safe and oven safe up to 500° F

### 1. NORMAL LID POSITION

Firmly in place for heating, simmering or steaming at vitamin-friendly low temperatures.

### 2. RAISED LID POSITION

The lid is placed on the side handles, and is thus raised by about 3mm so the steam can escape. It is also ideally suited for fast, easy and safe draining.

### 3. PARKED LID POSITION

The lid is tucked into the side handle, and the pot is uncovered. The new functional design ensures that the condensation runs into the pot.

## MULTI-FUNCTION SILICONE INSERTS:

Combine the new Concept Plus cookware with a multifunctional silicone insert (dishwasher and oven safe up to 500° F)

# ENTERTAINING & FOOD PREP

## MORTARS & PESTLES

- Perfect for fresh guacamole, pesto, or grinding dry spices
- Grind or crush whole spices and herbs quickly and easily, releasing their full flavor and essential oils
- Each mortar is cut from one solid piece of natural, uncoated granite or marble for longevity
- The untreated inside features a coarse finish to facilitate grinding, while the tall walls won't let ingredients escape
- The pestles are heavy, yet comfortable to hold
- **Top rated by a leading U.S. cooking magazine**

*"An excellent product. It's heavy, solid, with a slightly rough interior that makes it ideal for lightning-fast grinding and pureeing."*

**INDUCTION COOKTOPS**

Portable, quick and safe cooking anywhere!

- Easy control cooktop with touch control
- Highest quality glass-ceramic surface
- 180-minute timer with automatic shut-off
- Temperature adjustable from 140 °F to 430°F
- Must be used with induction ready cookware
- Frequency: 60 Hz. Voltage: 110-120 V. Watt: 1800W

*How does induction work? When an induction-ready pan is placed on the induction cooktop, a magnetic field is generated that efficiently heats nothing but the bottom of the pan. Since the heat is generated in the pan itself, the actual cooking surface (cooktop) remains cool to the touch.*
