# Icon Key

## NEW FOR 2019

Look out for our new and exciting collections being introduced in 2019.

## PASABAHCE PRODUCT

Many of our glassware items are from our exclusive supply partner Pasabache, based in Turkey these glassware items offer exceptional quality and design.

## 100% RECYCLED

Made from 100% Recycled Glass.

## 5 YEAR EDGE CHIPPING GUARANTEE

Utopia's 5 Year Edge Chipping Guarantee on a selection of ceramic products allows for free of charge replacement of chipping.

## STACKING

Items that are designed to stack, when space is at a premium.

## CUTLERY PERSONALISATION

A selection of cutlery can be personalised through colour coating, stamping, etching, laser engraving and diamond engraving.

## CRYSTAL

A selection of Utopia's glassware ranges are made from fine Crystal, giving clarity and finer rims.

## LINED & CE

Many of our glassware items can be government stamped and lined, to satisfy all European legal hospitality requirements.

## FULLY TOUGHENED GLASS

Fully Toughened glassware withstands greater impact, making the glass stronger therefore increasing longevity, when it does finally break, it will break into small blunt pieces increasing safety. Ideal for outlets with glass related violence or those deemed by license regulations.

## SUPER TOUGHENED GLASS

Designed for optimum strength and breakage. When Super Toughened Glass finally does break, it will break into roughly twice as many pieces as standard fully toughened glass. For superior strength and safety.

## TOUGHENED RIM

Many Utopia Glassware items have strengthened rims to reduce chipping and breakage.

## RIM AND FOOT GUARANTEE

Utopia's Rim and Foot Guarantee on a selection of products allows for free of charge replacement of breakages to the rim or foot of glassware.

## LIFETIME CHIP WARRANTY

A Lifetime Chip Warranty is offered on a selection of our glassware ranges. This allows for free of charge replacements on these items.

## ACTIVATOR MAX

A laser etching nucleation technology available on a selection of our glassware items to enhance the appearance of carbonated drinks.

## ACTIVATOR PERFORMANCE

A super nucleation technology to further enhance the appearance of carbonated drinks.

## POLYCARBONATE

Polycarbonate is a very strong and virtually unbreakable plastic, the strongest plastic of all.

## POLYSTYRENE

Not as strong as Polycarbonate, Polystyrene items are often used for shot glasses, where strength isn't as important.

## SAN

Styreneacrylonitrile is stronger than Polystyrene and can take a high amount of usage but will break under heavy pressure.

## EN12432 ACCREDITATION

This icon denotes that the straw has EN12432 Accreditation.

# Creative Table

## SIMPLY INSPIRED SERVICE

*Add style, creativity and flair to your serve with Creative Table. The products in Creative Table are extremely versatile, and will provide the perfect platform for any presentation, with a focus on style and up and coming trends and innovation.*

The revival of a classic British pastime can be seen in the ever growing trend for Afternoon Tea. This quintessentially British activity offers the opportunity to indulge.

A collection of vitrified porcelain, this range of versatile shapes showcase an elegant light finish with dappled brown rims. A perfect canvas for any food presentation. Whether used alone or mixed with other ranges, this collection is ideal for many outlets.

# UMAMI

Our 'Umami' collection has been created from the depths of Japan, sourced from an abundance of Japanese pottery producers. We have brought together a collection of true heritage and authenticity. The ranges sourced are individually crafted to produce items that can be used for traditional oriental serves or to add depth and texture to more contemporary dishes.

# Melamine & Buffetware

## SIMPLY INSPIRED SERVICE

*A collection brought together to showcase product that can be used for buffet service or items that can be used as display/presentation pieces. The Melamine collection has the look and feel of a ceramic product but without the weight and breakages, this makes it perfect for large scale outdoor or institutional catering environments.*

## WILDWOOD - MELAMINE

## Large Bowl

| Code   | Color | Size          | Pack |
|--------|-------|---------------|------|
| CT1038 | Blue  | 13.75" (35cm) | 6    |

## PERSONALISATION

### Embossment

The cutlery is embossed and then the reverse side is repolished to create a perfect finish. This method of personalisation is suitable for simple logos.

The minimum order quantity is 600 pieces spread across any number of shapes in the Eternum range that you select.

### Etching

This method of personalisation can reproduce complex logos, the detail would only have to be simplified if elements became illegible due to the size that was required for the item. Etching provides very sharp definition with a black appearance.

The minimum order quantity for this is only 480 pieces spread across any number of shapes in the Eternum range that you select.

### Laser & Diamond Engraving

This method of personalisation produces exact replicas of logos, except for highly intricate designs.

The minimum order quantity for this style of personalisation is only 480 pieces spread across any number of shapes in the Eternum range that you select.

### Be individual with coloured cutlery

Any of the Eternum collections can be PVD coated in your choice of Gold, Bronze or Anthracite colours.

The coating is Food Safe and is scratch resistant.

With a minimum order quantity of 480 pieces spread across any number of shapes in a range, this option is accessible to all.

*This outstanding crystal collection is the culmination of years of study and creation, and includes designs from the likes of Ron Arad.*

*Nude embraces the now and is unashamedly design led and unapologetically contemporary, offering affordable premium.*

*Nude is built on a firm belief that design is not about embellishment or style, but about the purity in the shape of an object.*

FEATURING:

*Ron Arad*

## STEM ZERO ION SHIELD Handmade

Introducing Stem Zero, made with our 'ION Shielding Technology' making it the world's toughest, yet finest lead free crystal glass.

Fully Toughened Glassware has been strengthened across its entire body making the glass resistant to impact damage at all points. This makes the glass stronger than regular annealed glass.

When Toughened Glass does finally break, it will break into small fragments making it impossible to cause serious lacerations.

Authentico, Barca, and Madrid are made from 100% recycled glass, showcasing the classic green colourway. All products are developed sustainably ensuring environmentally conscious production, without any compromise on style or quality.

When Super Toughened glass does finally break it will break into small fragments making it impossible to cause serious lacerations.

# 2050

BY THE YEAR 2050, UNLESS WE ACT NOW THERE WILL BE MORE PLASTIC THAN FISH IN THE SEA.

Single-use plastics are a frivolous reason to add to the global pollution problem, we need to focus on improving the way we consume and serve to make it as environmentally friendly as possible.

The following facts are just some we need to look at as a reason to move to environmentally friendly options:

There are believed to be 46,000 pieces of plastic in every square mile of ocean.

Microparticles of plastics are being absorbed by fish that are then eaten by humans.

The amount of plastic waste generated globally is estimated to be nearly 6.3 billion tonnes.

Plastic can take up to 500 years to decompose.

## ACTIONS WE HAVE TAKEN

After months of consultations our range of paper straws have now received **EN13432:2000** accreditation. This certification specifically focuses on compostability, making sure Utopia's non-metallic paper straws adhere to strict standards concerning biodegrading so they only have a positive impact on the environment. In other words they actually give something back to the earth when their useful life is over.

All our wooden stirrers and paper straws have been FSC sourced.

## PRODUCT TESTING

We believe in testing all our products to our own as well as industry standards. This is to make sure our products are best in the market for how and why they are used.

### Paper straws are tested against:

- Liquid absorption of different acidities and sugars
- Strength and diameter testing
- Durability with contact to varying liquids
- Ink leakage into liquid after set periods of time

We strive to make sure that our straws that enter the market match the level of quality we expect from all Utopia products.

WELCOME TO THE UTOPIA ECO-RANGE

# Care Advice & Information

Simply inspired service.

*The first taste is with your eyes! So to make sure you get the best return from the products you select for your outlet, we have included advice on care and usage to make sure that longevity in service and appearance is enhanced. This will make sure you receive the maximum benefit from your investment in Tableware.*

## CERAMICS CARE ADVICE:

### Storing:

Placing rubber or plastic mats on large stainless steel surfaces usually found in industrial kitchens can help reduce metal marking to ceramics.

Rubber or plastic mats can also be placed in stacking areas, trolleys or sinks to further reduce the chance of metal marking.

Replace or repair any plastic coated racks that may have become worn and the metal underneath exposed, as this again could cause damage to your ceramics.

### Using:

Don't scrape off leftovers – wipe off with a paper towel or a plastic/rubber scraper.

Utopia ceramics are suitable for microwave use, however be advised that any decorated item that includes metal will not be microwave safe.

Use cutlery that is of a high grade steel as a minimum requirement, as some cutlery in use today is made from low-grade steel, which being soft in nature increases the chance of metal marking.

Using metal utensils against ceramics can also cause metal marking, try to keep this to a minimum or use plastic utensils.

### Washing:

Utopia's products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic dishwashing found widely in most businesses. To ensure the quality level of the product it is important to take note of the following:

Strictly follow recommended dishwashing procedures set out by the manufacturer and use the correct dose application of the detergent.

The use of an approved detergent is recommended.

For effective cleaning, we recommend that the dishwashing temperature and the final rinse be set between 55 to 60°C. Operating at higher temperature levels in order to wash crockery 'properly' is a definite case of overkill and detrimental to all tableware.

Repair or replace any plastic coated metal in the dishwasher that may have worn away as this may result in metal marking.

Stack ceramics separately to other crockery in the dishwasher such as cutlery or pans and ensure items do not vibrate against each other during the cycle.

Overdosing on detergent or using excessively high temperatures will cause deterioration to the glazed finish or damage any decoration on the product.

### Metal Marking

Metal marking occurs when a ceramic item comes into contact with metal surfaces or utensils, which can cause metal tracing to be left on the ceramic item due to certain types of steel being softer than the glaze of the ceramic.

Despite the unsightly appearance of metal marking, it is not a cause for concern as it can be easily removed by the application of a gentle household non-abrasive cleaner.

## MELAMINE CARE ADVICE:

The correct handling and care of your Melamine buffet and table ware will enhance the appearance and longevity of the product in use. The following guide will assist you.

- Handle melamine dinnerware like any quality dinnerware.
- Use only plastic pads or plastic type bristle to remove dried food.
- Pre-soak melamine products, if necessary, in a high quality pre-soak dishwashing detergent.
- Do not use melamine products in an oven.
- Do not use melamine products in a microwave.
- Do not use harsh or abrasive cleaners, steel wool, or metal scouring pads.
- Do not use chlorine bleach.

Melamine is a thermosetting plastic that is strong, lightweight and hard with the look and feel of ceramic product. It is highly break and scratch resistant, but it is NOT 100% unbreakable, it can be scratched and broken.

Melamine is often used for dinnerware, mixing bowls and laminated counter tops because it resists acids, alkalis and most food stains.

Melamine is hard and smooth and can withstand some fairly warm temperatures, but it does absorb heat and will soften if it gets too hot. While melamine is perfectly safe when it comes in contact with warm temperatures, melamine is not microwavable.

In general, melamine products are not designed to withstand temperatures that exceed 100°C and should not be submerged in boiling water or placed in the oven.

Also, be sure to avoid exposure to hot objects or prolonged exposure to boiling water. Melamine is suitable for use over a bain-marie as the water is circa 70°C, to hold food above a temperature of 60°C.

Melamine is dishwasher safe (as long as the water temperature does not exceed the 100°C guideline). Scouring powder should not be used, as it will scratch the surface, also never use chlorine bleach on melamine buffet ware.

## CUTLERY CARE ADVICE:

Stainless Steel, though its name suggests otherwise, it is not completely 'mark proof'. It is much more resistant to staining or marking than other metals however contact with certain substances will start the process that leads to staining and pitting. Simple measures to reduce this and help maintain the quality of your cutlery:

### Storing:

Never store cutlery where it can become damp, as this can cause corrosion.

Store out of direct heat, as this can cause the metal to mark.

Never leave cutlery with food on as many corrosive substances are found in food, such as acids, like vinegar and lemon juice, mineral salts found in tap water, fats and meat juices.

Other corrosive substances are bleach and harsh detergents, so ensure your cutlery is not left to soak.

### Washing:

Utopia's products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic dishwashing found widely in most businesses.

To ensure the quality level of the product it is important to take note of the following:

When pre-rinsing cutlery ensure all food debris is removed before being washed.

Follow the manufacturer's instructions, particularly in relation to adding dishwasher salt as excess salt can cause corrosion.

Always wash cutlery immediately, never leaving it with food debris present.

It is advisable to place cutlery vertically into dishwashers with the head up; and not too tightly packed together, this assists the water flow at the end of the cycle.

Remove cutlery immediately after washing/dry cycle is finished and wipe over with a dry towel. If the cutlery is left to cool in the dishwasher, trace mineral salts and the dishwasher salt residue will settle on the cutlery in the moist atmosphere and start the pitting and staining process.

Never mix stainless steel and silver plated cutlery in the same basket of the dishwasher the chemical reaction between detergent and steel can cause the silver plate to mark.

Do not use the rinse and hold cycle on dishwashers with cutlery this will leave the cutlery to soak in water which can be damaging.

Wood handled cutlery is not suitable for cleaning in a dishwasher.

### Types of Metal – What is Stainless Steel?

Choosing the right type of cutlery for what you need it for can be confusing. Utopia have tried to simplify this by splitting the ranges into different types of stainless steel 18/10 and 18/0. These ranges can be further identified through the colour coded collections.

Stainless Steel is an iron and chromium alloy containing more than 11% chromium. There are three types of stainless steel used to make cutlery:

**18/10** – This is used for contemporary cutlery except knives; it contains 16–18% Chromium and 8–10% Nickel. This is the only steel that can guarantee against corrosion when properly cared for.

| AISI Code | Generic Name  | Chrome | Nickel | Others | Subtotal | Balance |
|-----------|---------------|--------|--------|--------|----------|---------|
| 304       | 18/10 or 18/8 | 16–18% | 8–10%  | 3%     | 29–33%   | Iron    |

**18/0** – This steel is used for value cutlery e.g. Parish, Economy or some value options of Contemporary cutlery. Due to the high % of chromium, it is more resistant than 13/10 but not as resistant as 18/10.

| AISI Code | Generic Name | Chrome | Nickel | Others | Subtotal | Balance |
|-----------|--------------|--------|--------|--------|----------|---------|
| 430       | 18/0         | 16–18% | –      | 2      | 18–20%   | Iron    |

**13/0 or Knife Steel** – This steel is used to make knives, as it can be hardened to create a sharp edge. The quality used is AISI 420, containing 13–14% chromium. This is the least corrosion resistant form of stainless steel.

| AISI Code | Generic Name | Chrome | Nickel | Others | Subtotal | Balance |
|-----------|--------------|--------|--------|--------|----------|---------|
| 420       | Knife Steel  | 12–14% | –      | 2      | 14–16%   | Iron    |

**Extra Process** Hardening

## GLASSWARE CARE ADVICE:

**Storing:**

Do not put cutlery into glasses.  
Do not stack glasses that have not been designed to stack.

**Using:**

Do not pick up glasses in clusters.  
Be careful to avoid contact with the beer tap.  
Do not put cold liquids into hot or warm glasses straight from the dishwasher as this can cause cracks.  
Pre-heat glasses for hot drinks by running them under the hot tap.

**Information:**

See below for a guide to replacement seals for our Preserve and Terrine collections.

| Item Code            | Item Description                    | Replacement Seal Code |
|----------------------|-------------------------------------|-----------------------|
| N210965-00000-B01006 | Preserving Jar 3.0L                 | N580139-00000-B01010  |

| R90115-000000-B01012 | Square Terrine 310ml 11oz (31cl)    | N580108-00000-B01010  |

**Washing:**

Utopia's products are specially designed to withstand the rigours of the Foodservice and Hospitality trade, including automatic glasswashers found widely in most businesses. To ensure the quality level of the product it is important to take note of the following:

- Always wash new glasses before use.
- Always use a non-caustic detergent as caustic detergents affect head retention, etch the glass and give the glass a shadowy tinge.

- Water on the premises should be stored at 60°C. If water is stored at a higher temperature e.g. 85°C, even when this is reduced because of travelling to the machine, it could still be high enough to bake debris onto the glass.
- Coffee cups should never be washed in a glass washing machine, as coffee dregs can taint the water and stain the glasses – this also applies to drinks that contain cream.
- If cracks or chips are found in glasses, they should be discarded immediately and never put in the dishwasher.
- Gold decorated glassware is suitable for handwash only.

## PLASTIC BARWARE CARE ADVICE:

Improved working practices for the use of Polycarbonates will extend the life of the product:

- Polycarbonate drink ware is supplied with the verified CE Mark or Lined and Stamped exactly like Glassware.
- Polycarbonate Barware is dishwasher safe to a temperature of 60°C.
- When using glass washers, it has been suggested that the use of detergent without rinse aid is preferred.
- To maintain the product in its best condition, it is recommended that a low temperature wash cycle below 60°C for both wash and rinse temperature is used. The combination of detergents and raised temperatures can lead to environmental stress cracking in the plastic surface. If washer temperatures are above this then it is recommended to hand wash the plastic barware.
- It is important to make sure that the Polycarbonates are not rubbing together during the rinse cycle in a glass washer.
- It is safe to use Liquid Renovate. This will enhance the visual presentation of the product where needed.
- Regular checking of Polycarbonates to assess scratching is needed so as to offer the customer a perfect drink.
- It is important that Polycarbonates are not stacked tightly together as the inside of the product will scratch.
- Polycarbonates are quite often found on the floor and on hard floors they will scratch. Where possible Polycarbonates should not be left on the floor.
- Polycarbonate is a tough transparent thermoplastic that has many applications, which demand high performance properties.

Polycarbonate drink ware is almost indestructible, hard and rigid and in many cases virtually identical to glass. It is the preferred product for Police Forces and Local Licensing Authorities where drink related violence is an area of concern.

Although the product is virtually unbreakable it is subject to considerable wear and tear, unlike glass, which would simply break and then be replaced, regular checking of polycarbonates to assess scratching is needed as to offer the customer a perfect drink.

Utopia Tableware supply Plastic Barware in four different types of plastic:

- – our plastics shots are Polystyrene, these are dishwasher safe up to 100 washes.
- (Styreneacrylonitrile) - is stronger than Polystyrene and can take a high amount of usage but will break under heavy pressure. This product is glass washer proof.
- – is a very strong and virtually unbreakable plastic, the strongest plastic of all. Our polycarbonate glassware is glass washer safe up to 500 washes.
- – is a transparent copolymerization primarily composed of methyl methacrylate (MMA) and styrene monomer (SM). This is glass washer safe up to 100 washes.

## CREATIVE TABLE CARE ADVICE:

Creative Table includes an array of products all of which require different care to ensure you keep them at their best. See below for information on how to look after your Creative Table products.

### Estrella Traditional Terracotta:

- Suitable for traditional ovens, hobs, microwaves & freezers.
- Terracotta is naturally fragile and should be handled with care.
- Terracotta is naturally porous, soaking in water should be avoided
- Terracotta is suitable as oven to tableware.

### Fuji:

- As above.
- However, with increased strength and durability

### Copper Presentation Serve ware:

- Please be aware copper will naturally oxidise over time.
- To maintain an optimum finish, hand washing is recommended.
- Using metal scourers or abrasive cleaners will affect the finish of your copper serve ware, to avoid this, wash in hot water straight after use with a soft cleaning sponge.

### Stainless Steel Presentation Items/Barware:

- Not suitable for cooking and should be used as presentation only.
- Suitable for dishwashers
- Not suitable for ovens or microwaves.
- Galvanised items should always be used with presentation papers.
- Never leave in a damp environment for prolonged periods of time.

### Wire Baskets & Presentation Papers:

- Not suitable for cooking and should be used as presentation only.
- Suitable for dishwashers
- Not suitable for ovens or microwaves
- Presentation papers are 100% biodegradable and can be discarded in food waste.

### Cast Iron:

- Cast Iron is ideal for use in the oven and on stoves and withstands temperatures up to 260°C.
- Always use heat protective wear when handling the products – handles will become extremely hot.
- Never place hot items directly onto unprotected surfaces – it is recommended to use the Acacia Wooden Boards that are available with all Utopia Cast Iron pieces.
- For care of the Cast Iron Wooden Boards – follow the 'Acacia Wooden Board/Tray' care advice.
- Always use Plastic/Wooden utensils – metal may damage the surface of the enamel.
- Abrasive scourers may also damage the enamel surface – to remove tough residue soak in hot soapy water.
- Ensure completely dry before storing or stacking.

### Bento Boxes:

- Not suitable for dishwashers, hand wash only.
- Not suitable for oven or microwave use.
- Abrasive scourers may damage the surface of the item – use a soft sponge and soak in hot soapy water for tougher residue.

### Natural Woods:

- Store away from direct heat sources and direct sunlight.
- Hand wash in warm soapy water
- Do not soak in water
- Dry immediately
- Not dishwasher safe
- Bamboo drink paddles are suitable for glass washers – always follow the recommended dishwashing procedures outlined by the manufacturer and use the correct dose application of detergent.
- Sourced from a sustainable wood source
- Darwin, Acacia, Olive and Fir Wood will vary significantly in size and shape as these are natural cuts of wood.
- Restore Natural Woods with a wiping of olive oil

### Slate/Granite:

- Being natural stones – our slate and granite items may vary slightly in size and texture.
- The characteristics of slate are that the edges can naturally chip and create sharp points – care must be taken when handling these items.
- To clean wipe down with a damp cloth and mild detergent.
- For Slate – any scratches can be treated with natural oil and this should be followed from time to time to keep the product looking its best.

### Enamel

- Oven proof and Dishwasher safe
- For best results, after use soak in warm water, then wash gently with a liquid detergent

- Do not use abrasive cleaning pads or powders
- Items will chip if handled roughly

### Trays:

- Plastic Black Non-Slip Trays:
- Always ensure trays are stacked on flat surfaces to eliminate accidental damage.
- Not suitable for dishwashers – wipe down with a clean damp cloth after each use.
- Do not leave submerged in water.
- Do not stack whilst damp.
- Do not overload trays, may cause accidental damage or injury.

### Fast Food Trays:

- Always ensure trays are stacked on flat surfaces to eliminate accidental damage.
- Fast Food Trays are suitable for dishwashers – always follow the recommended dishwashing procedures outlined by the manufacturer and use the correct dose application of detergent.
- Fast Food Trays have stacking lugs to accelerate drying and can therefore be stacked straight after washing without prior drying.
- Surface can become slipping when wet, extra caution needed.
- Always stack separately to other crockery in the dishwasher to ensure items do not damage each other in the cycle.

## GASTRONORM SIZING GUIDE

Food pans available in standard Gastronorm sizes.

| Range Name          | Page     | Range Name        | Page     | Range Name                | Page     |

## Showrooms

Utopia prides itself on having three exquisitely presented showrooms, a flagship Utopia showroom complete with our exclusive Nude presentation and a dedicated Back of House showroom based at our Headquarters in Chesterfield, and a further Utopia showroom at our London base in Holborn.

These showrooms are built with distributor partners and end users in mind, and are designed to inspire and excite.

We supply our market by understanding it better than anyone else; we work hard to make sure that we have the right products for the right task in every situation.
