Dear partners,

As proof of our commitment and confidence in the future, we proudly publish today the new edition of the Paderno catalogue, an essential tool for chefs and professionals. You will find a richer range of products and a review of prices in many categories, to present you an increasingly competitive and quality offer.

In recent months we have also worked to support all our clients through constant communication, strengthening our customer service and investing in the creation of further business opportunities, introducing for example new **drop shipment** solutions. Smart working and the most modern software infrastructures are the key points in our Digital Transformation process, that involves Paderno and all the brands of the Arcturus Group.

We are aware that especially in hard times it is important to be close to each other. That's why, today more than ever, we remain at your side.

Cari partner,

nonostante le difficoltà legate alla recente emergenza sanitaria, durante il periodo di lockdown non ci siamo mai fermati e non abbiamo mai perso l'ottimismo.

A testimonianza del nostro impegno e della fiducia che riponiamo nel futuro, è quindi con estremo orgoglio che pubblichiamo oggi la nuova edizione del catalogo Paderno, strumento indispensabile per gli chef e tutti i professionisti del mondo della ristorazione. Troverete una gamma di prodotti sempre più ricca e una revisione dei prezzi in molte categorie, così da presentarvi un'offerta sempre più competitiva e di qualità.

In questi mesi abbiamo inoltre lavorato per supportare tutti i nostri clienti attraverso una costante comunicazione, potenziando il nostro servizio di assistenza e investendo nella creazione di ulteriori opportunità commerciali, ad esempio introducendo nuove soluzioni di **drop shipment**. Consistently with the functional approach, which has always marked the brand, Paderno offers a complete product line and professional tools, easily recognizable in the kitchen, which can reduce possible mistakes during their use to protect people affected by celiac disease. Developed and realized in 2013 in collaboration with Associazione Italiana Celiachia Lombardia ONLUS (Italian Society for the Celiac Disease – Lombardy Section), this project makes Sambonet Paderno Industrie S.p.A. the first company in its market that offers to the HoReCa channel a complete line of items intended for gluten-free cooking.

Some distinguished special features, such as golden PVD handles for pans and pots and a special customised logo for utensils, will allow professionals to easily identify all these items in the kitchen.

This product line aims at:

- Reducing the risk of accidental food cross-contamination;
- Making it easier for professionals to work and provide services to clients with food intolerances;
- Raising awareness on the gluten-free diet issue in the industry so as to respond to the new needs of consumers.

Coerentemente all'ottica di servizio che contraddistingue da sempre il marchio, Paderno propone una linea completa di articoli e strumenti professionali facilmente identificabili in cucina, in grado di abbattere eventuali errori durante il loro utilizzo a salvaguardia del cliente celiaco e di tutti gli intolleranti. Sviluppato e concretizzato nel 2013 in collaborazione con l'Associazione Italiana Celiachia Lombardia ONLUS, questo progetto colloca Sambonet Paderno Industrie come prima azienda del settore a offrire al canale Ho.Re.Ca una linea completa di articoli da destinare alla preparazione di pietanze senza glutine.

Attraverso alcuni elementi distintivi e differenzianti, come manici in PVD oro per pentole e padelle e personalizzazione con un logo specifico per utensili, tutti gli strumenti saranno facilmente identificabili in cucina.

Questa gamma contribuisce a:

- Diminuire il rischio di accidentali contaminazioni crociate degli alimenti;
- Facilitare il professionista nell'operare e nell'offrire un servizio a favore del cliente con intolleranze alimentari;
- Sensibilizzare il settore sul tema "gluten free" di fronte alle nuove esigenze dei consumatori.

# STEEL FRYING PANS PADELLE FERRO

Iron is ideal for cooking at high temperatures because its low capacity of heat transmission prevents temperature leaps. As it is non-stick, food does not stick to it. It withstands very high temperatures and improves its performance with use. Iron pans are perfect for fried food, omelettes or fine crêpes. Wash the black iron pan in water as little as possible and always keep it greased. Iron pans are ideal also for cooking on induction hobs.

Il ferro è ottimo per le cotture a fuoco molto vivo perché, non avendo un'alta capacità di trasmettere calore, evita improvvisi sbalzi di temperatura. Essendo un materiale antiaderente, evita l'attaccamento dei cibi. Sopporta temperature elevatissime e col tempo migliora il suo rendimento. I recipienti in ferro sono i più adatti per frittare, omelette o sottili crêpes. La padella in ferro nera va lavata con acqua il meno possibile e mantenuta sempre unta. Il ferro è il materiale ideale anche per cotture a induzione.

# ENAMELLED CAST IRON GHISA SMALTATA

COOKWARE  
PENTOLAME

Suitable for use on all cooking hobs (gas, electric, ceramic, induction) and ovens (gas, oil, coal or wood) except microwave. A perfect harmony of cast iron, enamel and high quality. Designed and constructed to absorb and spread the heat evenly. Cast iron is suitable for all cooking techniques, for soups, roasts, rice, desserts, for braise that require a long cooking and likewise ideal for meats and grilled vegetables as it enhances flavors and aromas like barbecue style. Cast iron also features non-stick. The high temperature of the pan sears the meat surface. All the flavor, water and nutritional values remain sealed in the food. When cooking in casseroles, the steam generated thanks to the special design of the cover condenses falling back into the food not only retaining flavors and aromas but providing the best protection for nutrients and contributing to a healthy diet. Cast iron is a material 100% recyclable and therefore environmentally friendly. Moreover, thanks to its ability to retain heat for a long time it allows a considerable saving of energy. With closed lid on the table, the pot will preserve the temperature for a second serving. Cast iron retains the heat but as well the cold... can be used to keep the food fresh. Stored for a short time in the refrigerator, keeps food cool during hot summer days, ideal for serving pasta or rice salads, etc. Practical and easy to clean. These cast iron pots and pans are dishwasher safe thanks to the special technology applied to their enameling method. Ergonomic knobs and handles made of cast iron and stainless steel, suitable for use on all heat sources and ovens except microwave. Be careful, they heat up during cooking, it is recommended to handle with a dry thick cloth.

Idonee all'uso su tutte le fonti di cottura (gas, elettriche, vetroceramica, induzione) e forni (gas, petrolio, carbone o legna) ad esclusione di microonde. Una perfetta armonia tra ghisa, smalto e alta qualità. Progettate e costruite per assorbire e diffondere il calore in modo uniforme. La ghisa è adatta a tutte le tecniche di cottura, per zuppe, arrostiti, risotti, dolci, per piatti che richiedono una lunga cottura tipo brasati e allo stesso modo ideale per carni e verdure alla griglia in quanto ne esalta sapori ed aromi in stile barbecue. La ghisa ha anche caratteristiche di antiaderenza. La temperatura elevata della padella cauterizza la superficie della carne. Tutto il sapore, l'acqua e i valori nutrizionali rimangono sigillati nel cibo. Nella cottura in casseruole, il vapore generato grazie al particolare design del coperchio si condensa ricadendo e mescolandosi nuovamente nel cibo non solo trattenendo sapori e aromi ma fornendo la miglior protezione alle sostanze nutrienti e contribuendo ad una dieta sana. La ghisa è un materiale riciclabile al 100% e quindi ecologico. Inoltre, grazie alla sua capacità di mantenere il calore per lungo tempo consente un notevole risparmio di energia permettendo di cuocere a fuoco basso. Anche a tavola mantengono in cibi in temperatura. La ghisa mantiene però il caldo come pure il freddo... può essere usata per mantenere il cibo fresco. Riposta per un breve periodo in frigorifero, mantiene il cibo fresco nelle calde giornate estive e ideale per servire insalate di pasta, riso, farro, ecc., ecc. Pratica e facile da pulire. Queste casseruole e padelle in ghisa sono lavabili in lavastoviglie, per merito della speciale tecnologia applicata al metodo di smaltatura. Manicatura e pomoli dal design ergonomico sono in ghisa e inox. Durante la cottura si raccomanda di maneggiare con un panno consistente e asciutto per evitare di scottarsi.

STAMPED KNIVES  
COLTELLI TRANCIATI

The professional cutlery line “Color-Line” helps to reduce the risk of cross contamination using a Color Coding System which identifies each knife with a specific task: different food processing areas are easily identified. The steel used for this cutlery line has exceptional hardness and very high resistance to corrosion due to ICE-HARDENED system, a special process to harden the steel.

La linea di coltelleria professionale “CCS”– Color Coding System riduce i rischi di contaminazione incrociata grazie all'utilizzo di un Sistema di Codifica dei Colori che identifica ogni coltello per un uso specifico e permette di individuare facilmente le diverse aree di lavoro. Gli acciai utilizzati per questa linea di coltelleria presentano un'eccezionale durezza ed elevata resistenza alla corrosione, grazie all'uso del sistema ICE-HARDENING, processo speciale per temprare l'acciaio.

# JAPANESE SUSHI KNIVES COLTELLI SUSHI GIAPPONESI

KNIVES  
COLTELLERIA

Excellent choice when preparing sushi and vegetables. Molybdenum/ Vanadium s/s blades for excellent edge retention, razor sharp edges, slip resistant wooden handles. The blades are sharpened with the traditional Japanese single bevel to improve sharpness. The large beveled one-sided edge is much thinner than a two-sided edge. This thinner, sharper edge makes for cleaner cuts through the soft flesh of fish, in particular. Using these knives will avoid bruising the delicate texture of raw fish and destroying the freshness of the fish. The thinner edge is more fragile than the edge on western knives. Do not use for cutting anything solid including larger fish bones. Due to the special blade sharpening and s/s used we highly recommend to only hand wash and dry the blades thoroughly immediately.

Una scelta eccellente per la preparazione di sushi e verdure. Lame in acciaio inox, molibdeno e vanadio, per un'ottimale tenuta del filo, affilatura a rasoio, manici in legno antiscivolo. Secondo la tradizione giapponese l'affilatura è unilaterale ed il filo è molto più sottile rispetto a quello della normale affilatura dei coltelli occidentali. Questo rende i tagli più nitidi ed evita di creare traumi alla trama delicata di carne e pesce crudo. Non utilizzare per il taglio di solidi incluse grosse lisce di pesce. Data la particolarità dell'affilatura e dell'acciaio impiegato si consiglia vivamente di lavare a mano ed asciugare immediatamente con cura le lame.

Sharp and thin, it is used by chefs in Japan for katsuramuki, a traditional style of peeling vegetables into thin sheets. – \*Doppia affilatura. Coltello estremamente affilato con una punta quadrata. Questo coltello è usato per tagliare verdure e quando è tenuto ben affilato può tagliarle in fette sottili come un foglio di carta.

The Tako Sashimi is a variation of the Yanagi and is used to slice straight-cut sashimi. The blunt tip and balanced weight works well on difficult ingredients like octopus, from which it gets its name. Originated in Kanto (Tokyo) region. – Il coltello Tako Sashimi assomiglia di più ad un coltello occidentale ed è utilizzato per affettare tagli spessi di carne per sushi. Ha la lama senza punta, per evitare di rovinare i tentacoli del polpo.

Originated in Kansai (Osaka) region. – Viene utilizzato per tagliare sottili fette di verdure, carne o pesce, nonché per tagliare in generale a dadi o a fette. Grazie alla sua lama sottile ed affilata è utilizzato anche per creare guarnizioni o tagliare i rotoli di sushi.

**MICROPERFORATED CAKE RINGS**  
FASCE MICROFORATE

SS

The micro-holes allow to support the edges of the cake avoiding to collapse during cooking. They also allow to expel the moisture from the dough, obtaining a perfect and always crispy cooking.

I microfori permettono di sostenere i bordi della torta evitandone il collasso in cottura. Consentono inoltre di espellere l'umidità, ottenendo una cottura sempre perfetta e croccante.

# NON STICK CAKE MOLDS TORTIERE ANTIADERENTI

PASTRY  
PASTICCERIA

Wash the mold before the first use. Slightly grease inside surface with oil, butter or margarine before baking. Allow cake to cool down a little before removing from the mold. For the cleaning, hand-wash with dish soap and dry the mold immediately after washing. Use only in traditional ovens (no microwave). Do not use sharp objects or others metal tools which could damage the pan surface. Do not use on a flame or other direct heat source, including stove tops. Do not exceed 230°C. Non-stick coating PFOA free.

Lavare lo stampo prima di utilizzarlo la prima volta. Ungere leggermente l'interno con olio, burro o margarina prima di infornare. Prima di sfornare, lasciare raffreddare per qualche minuto. Lavare a mano con detersivi liquidi ed asciugare lo stampo immediatamente dopo. Utilizzare esclusivamente in forni tradizionali (no microonde). Non utilizzare oggetti appuntiti, polveri abrasive o pagliette metalliche che possano rigare la superficie degli stampi. Evitare il contatto con fonti di calore dirette o fiamma libera. Non superare la temperatura massima di 230°C. Rivestimento antiaderente privo di PFOA.

**BISCUIT DECORATION FRAMES CM 60X40**  
GRIGLIE DECORO BISCUIT CM 60X40

Place the grill on silicone mat. Spread uniformly the decorating paste. Take off the grid and put into refrigerator. Afterwards spread uniformly the biscuit. Bake in the oven at 230°C for 8 minutes. Place the biscuit upside down on a greaseproof paper and remove carefully the silicone mat. By using an extensible pastry cutter cut the biscuit into stripes.

Appoggiare la griglia su un tappeto di silicone. Spatolare la pasta decoro uniformemente. Togliere la griglia e passare in congelatore. Successivamente stendere il biscuit. Cuocere in forno a 230°C per 8 minuti, appoggiare il biscuit capovolto su un foglio e togliere delicatamente il tappeto. Tagliare le fasce di biscuit nella larghezza desiderata.

The use of this silicone allows an optimal heat distribution, which offers an even baking and colour, as well as perfect non-stick properties for an easy and perfect demoulding. The Flexipan moulds offer great performances with high lifetime expectancy: from 3,000 to 5,000+ baking cycles, depending on the conditions of use. Can be used for cooking and freezing (from -40°C to +240°C), for sweet and/or savory recipes. Can be easily cleaned with water.

L'uso di questo silicone consente una distribuzione ottimale del calore, offrendo una cottura e un colore uniformi, nonché proprietà antiaderenti perfette per una facile e perfetta sfornatura. Gli stampi Flexipan offrono grandi prestazioni con un'elevata aspettativa di durata: da 3.000 a 5.000+ cicli di cottura, a seconda delle condizioni di utilizzo. Può essere utilizzato per cucinare e congelare (da -40°C a +240°C), per ricette dolci e/o salate. Si pulisce facilmente con acqua.

Grazie alle impronte preformate, preparare bignè uguali e regolari diventa facile. Non è più indispensabile nè spennellare con tuorlo nè forare la pasta. Grazie alle proprietà antiaderenti del Silform®, l'estrazione è impeccabile. La base del bignè sarà chiara e netta conferendogli così una perfetta stabilità. Silform® for Choux Pastry.

GLASS JARS  
VASETTI WECK

Perfect for the sterilization and pasteurization of any product, fruit, vegetables, but also meat, fish, foie gras or delicatessen products. They are suitable for serving jams and sauces: they also look beautiful on the table. They are perfect for cooking and serving on the table. They are 100% pure glass, so they do not release harmful substances into food, they resist very high temperatures (up to 200°C in the oven), they can be washed in the dishwasher (including seal).

Perfetti per la sterilizzazione e la pastorizzazione di qualsiasi prodotto, di frutta verdura ma anche di carne, pesce, foie gras o prodotti di salumeria. Sono indicati per servire marmellate e salse di accompagnamento: inoltre belli da vedere sulla tavola. Sono i vasetti perfetti per la vasocottura e per servire in tavola. Sono al 100% in puro vetro, quindi non rilasciano sostanze nocive nel cibo, resistono a temperature elevatissime (fino a 200°C in forno), si possono lavare in lavastoviglie (guarnizione compresa).

**PEPPER**

Made of case-hardened steel for higher, more consistent output with fewer turns. Equipped with a helix-shaped double row of teeth that guide and hold the peppercorns for a perfect grind. The grind is essential for unlocking the full flavour of your pepper. To get the best out of your pepper grinding mechanism, we recommend to use peppercorns with a diameter of 6 mm or less. Black, white and dry green peppercorns can be ground in Peugeot pepper mills. The pink berries can be ground only if in a blend (max 15% pink) with one of these peppercorns. Dried coriander is also suitable for the pepper mechanism.

**DRY SALT**

The Peugeot salt mechanism is designed to grind cooking salt (rock salt). It is made of a special stainless steel that resists corrosion. Its shape is specifically adapted to transform dry salt crystals to a fine powder. To get the best out of your Peugeot salt grinding mechanism, you should use salt with a size of 4 mm max.

**WET SEA SALT**

For wet sea salt, a specially designed mechanism has been created because the natural consistency and moisture content do not allow the use of an ordinary salt mill. An innovative patented system enables a high-performance grind without blockage even with very humid or compressed salt. This specific mechanism is composed of 3 fins ensuring both resistance and constant output, and of a spiral that mixes the salt and guides it, ensuring a constant flow. Exclusive ceramic mechanism.

**NUTMEG**

The Peugeot nutmeg mill is equipped with a double stainless steel blade/grater and a strong claw which enables the nutmeg to be very finely ground.

**CHILI PEPPER**

The chili pepper mechanism is a Peugeot exclusive product. This patented model has a pre-cutting system and a mechanism that grinds dry chili pepper. Like the pepper grinder it has a patented treatment that protects the steel from corrosion while maintaining its sharpness and wear resistance.

**PEPE**

Realizzato in acciaio, beneficia di un trattamento che lo protegge dalla corrosione, conserva il potere tranciante e lo rende resistente all'usura. Dotato di una doppia fila di denti elicoidali che guidano i grani di pepe verso il basso. Trancia e non schiaccia i grani, per sprigionarne sottilmente sapore e profumo. Consigliamo di utilizzare grani di pepe con un diametro di 6 mm o meno. I grani di pepe neri, bianchi e verdi secchi possono essere macinati nei macinapepe Peugeot. Le bacche rosa possono essere macinate solo se in miscela (max 15% rosa). Il meccanismo del pepe è adatto anche al coriandolo essiccato.

**SALE SECCO**

Il meccanismo del sale è progettato per macinare il sale da cucina (sale grosso). È fatto di uno speciale acciaio inossidabile resistente alla corrosione. La sua forma è specificamente adattata per trasformare cristalli di sale secco in una polvere fine. Per un risultato ottimale si consiglia di usare sale con una dimensione di 4 mm max.

**SALE MARINO UMIDO**

Per il sale marino umido, è stato creato un meccanismo apposito. Un innovativo sistema brevettato consente una macinatura ad alte prestazioni senza ostruzioni anche con sale molto umido o compresso. Il meccanismo è composto da 3 alette che ne garantiscono sia la resistenza sia un rendimento costante, e di una spirale che mescola il sale e lo guida assicurandone un flusso costante. Meccanismo esclusivo in ceramica.

**NOCE MOSCATA**

La macina è dotata di una doppia lama per grattugiare in acciaio inox e di un robusto dischetto uncinato che permette di grattugiare l'intera noce molto finemente.

**PEPERONCINO**

Questo meccanismo è un prodotto esclusivo Peugeot. Il modello brevettato ha un sistema di pre-taglio e un meccanismo che permettono di macinare il peperoncino essiccato. Come il macinapepe, il meccanismo subisce un trattamento brevettato che protegge l'acciaio dalla corrosione pur mantenendo la sua affilatura e resistenza all'usura.

**ADJUSTABLE GRINDING SYSTEM**

For electric or manual mills.

Patented precision system that enables precise grind adjustment settings. 6 pre-defined levels of grind for pepper and 6 for salt. Rotate the ring at the base of the mill and select one of the positions, each corresponding to a specific grain.

**REGOLAZIONE DELLA MACINA**

Per macine manuali ed elettriche.

Sistema brevettato che permette una regolazione predefinita della macinatura. 6 Livelli per il pepe e 6 Livelli per il sale. Ruotare l'anello alla base della macina e selezionare una delle posizioni, ognuna corrisponde ad una determinata grana.

**CLASSIC ADJUSTABLE SYSTEM**

Thumbwheel grind adjustment on electric grinders is found below the grinding mechanism. Grind adjustment nut on manual mills, turn the nut. Clockwise to obtain a finer grind, counter-clockwise to obtain a coarser grind.

**REGOLAZIONE CLASSICA**

Negli apparecchi elettrici la rotella di regolazione si trova sotto il meccanismo di macinatura. Negli apparecchi manuali la regolazione si effettua ruotando il dado/pomolino. Ruotare in senso orario per ottenere una macinatura più fine, in senso antiorario per ottenere una macinatura più grossa.
