• **CHEF'S KNIFE:** A versatile knife. Gives perfect results especially in cutting, paring, slicing and dicing. Easy and comfortable-to-use despite its height and width. • **SANTOKU KNIFE:** The word "Santoku" means "three advantages". This knife is suitable for slicing and chopping products such as meat, fish and vegetables. The wide surface allows practical handling and gathering of components. Grooves on the surface prevent sticking of any material to the knife.
• **SLICING KNIFE:** The ideal knife for slicing meat, vegetables and fruits. • **PARING KNIFE:** The ideal knife for paring vegetables and fruits.• **CHOPPING KNIFE:** The ideal knife for dicing or julliening. • **BREAD KNIFE:** Thanks to its serrated surface, it easily prevents disintegration and crushing while cutting bakeries such as bread, cake or sandwiches.
• **CARVING KNIFE:** The ideal knife for functions especially such as cutting cooked meat. Serrated surface is designed for easy cutting operations.
