A breath of fresh air

UNI6

Functionality at its best

With the current edition of our NEXT magazine we present our latest styles from the Crawler, uni6 and the Original series.

In addition to the existing shoes and boots of our Crawler line we can now also offer breathable styles like a sandal and clogs with aluminum toe-cap as well as a low shoe with textile inlays and a composite toe-cap. Weight-optimized safety, extreme comfort and sporty design will convince you.

Our very popular series uni6 has also been accomplished by further functional styles. From now on you can choose from sandals and slip-ons made of A-micro, a very durable microfiber requiring very little maintenance. Furthermore we present two brand-new and unique leather boots with steel toe-cap. As usual we offer the sandals and the slip-on with or without steel toe cap.

Even the well established classics of the the Original series now appear in a new guise, offering diverse forward looking benefits through microfiber uppers and TPU outsoles.

All our new products are now available from stock.
